

## **2011 Windsock for Decorations**

**The decorations for 2011 will focus on flowers around the world. We are asking you to make a windsock that will be yours to keep. I am supplying a pattern and will have others in the upcoming newsletters. Please put a small name tag on the inside.**

**The first piece is a paper piecing pattern, It is an easy one and is worked in 4 parts. It is numbered and color coded, but you can put in any color you want but please use some of blue background for the sky. The windsocks do not have to be made from this pattern. It can be from any pattern you want to use. It needs to be about 10" long in the body and about 6 to 8 inches in diameter. The streamers need to be about 24" in length.**

**I am using the plastic strips from package shipments. It is about 1/2" wide and can be cut and stitched together to make a circle. This will be inside the binding that goes around the top of the windsock.**

**You will need to bind the top and bottom of the cylinder.**

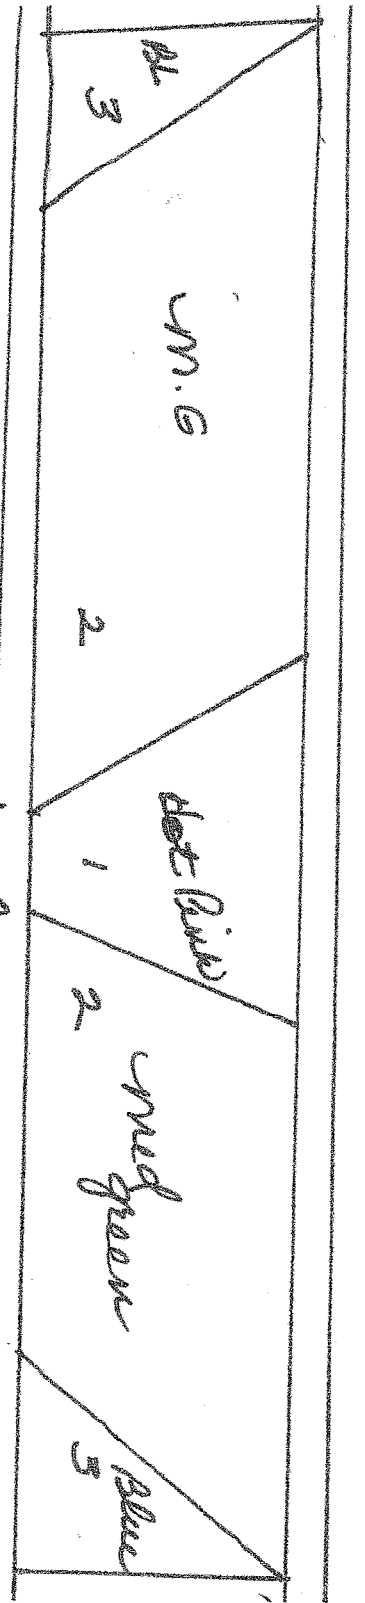

**The windsock will need to have about two pieces to make the sock. I used two pieces for the display sock at the guild and will use two for the paper pieced one.**

**Happy creating. We will have a bright and beautiful show and we can all make it a welcome site and have fun doing it. Play a little.**

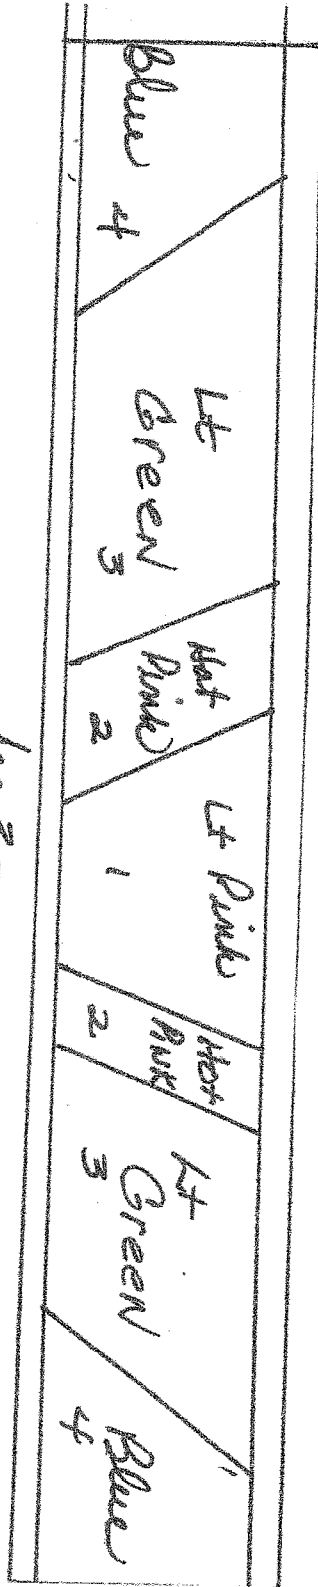

**Thanks for all the help you give to the show board.**
