

Woven Panel Supply List & Pre-Class Preparation

November Schoolhouse Class: Woven Panel

Instructor: Debbie Williams

Saturday, November 5, 2022, 9am to 3pm

[Pharr South Activity Center](#)

Supply List:

FABRIC: you will need 6 colors, preferably gradients. Solids / blends work best. I used simple batiks.... Grunge by Moda works well also. Your center color needs to be either the darkest, or lightest. My sample is done with the center dark.

Color #1 is the center color. Colors 2, 3, 4, 5 and 6 are placed in this order, each side of the center color. It is important to determine your color sequence so that you cut the appropriate number of strips for each color.

__ You need 1/4 yard for colors 1, 3,4,5 and 6

__ You need 1/3 yard for color 2

__ 2/3 yd of light to medium weight woven fusible interfacing

__ Lots and lots of sturdy straight pins. I like the ones with the round yellow tops.

__ Sharpie pen

__ Scissors

__ Blue painters' tape (do NOT use masking tape, it leaves a sticky residue on your fabric)

__ 1/2" bias tape maker tool - available on Amazon (see Fig 1)

__ WEFTY needles - available on Amazon (see Fig 2)

Woven Panel Supply List & Pre-Class Preparation

PRE-CLASS PREPARATION

PRIOR TO CLASS you need to cut your strips from each color (do NOT cut on the bias) and prepare your strips to weave. That way you can use class time to create your panel. If your strips are not prepared in advance, you will spend the majority of time just getting ready, and may not have time to actually weave the panel.

Chk	Number of strips from each color: It is not a bad idea to have an extra strip	
	Color #1	8 Strips
	Color #2	11 Strips
	Color #3	8 Strips
	Color #4	8 Strips
	Color #5	5 Strips
	Color #6	4 Strips

___ Cut 1" strips, using the chart above for each color. **DO NOT CUT ON THE BIAS.**

___ Using a 1/2" Bias Tape Maker tool, iron, and spray starch, create the 1/2" strips.

___ Wrap your strips around something (I used cardboard) and label each color (see Fig 3).

You are now ready for class.

A 20x30 piece of 1/2" foam board will be provided for you at class.

I will draw the necessary markings so that you will be ready to start your panel.
